## Install mininet & sdn controller

## 請安裝並使用ubuntu 20.04

- sudo apt update
- sudo apt install python3 python3-pip –y
- python3 -m pip install --upgrade pip
- nano ~/.bashrc
- 最底下加入 export PATH=\$HOME/.local/bin:\$PATH
- source ~/.bashrc
- echo \$PATH
- pip3 install ryu
- ryu-manager --version確認是否安裝成功
- PS.如果出現cannot import name 'AIREADY\_HANDLED' from 'eventlet.wsgi':
- pip3 install eventlet==0.30.2

## 請安裝並使用ubuntu 20.04

- sudo apt install mininet
- sudo mn –version確認是否安裝成功

## 執行mininet

- [ryu manager]
- ryu-manager ryu.app.simple\_switch\_13

- [mininet]
- sudo mn --topo single,3 --controller=remote,ip=127.0.0.1 -switch=ovsk
- pingall 檢查封包收送狀態
